New York, March 27.—Another halt in the upward movement of stock came to-day as a result of seme unexpected fluancing by the United States Steel Corporation. The market gave every evidence of continuing its rise of last week until it became known that the Steel Corporation had sold some \$30.000.000 of its bonds for working capital and necessary improvements to its more important plants.

ers were matters that the speculators utilized with some effect early in the day.

Reading, the Harrimans and Amragamated Copper were the stocks which supplied the greater part of the bull ammunition in the trading. Strength in Southern Pacific was predicated upon the belief that February earnings would prove more favoraste in the months preceding. Coppers were held in check because of the feeling that the recent rise in the metals had been more upon expectations than actual conditions. The movement in the early afternoon was retarded by ill-concealed attempts to manipulate unimportant Copper shares in which there never has been more than an inconsiderable interest.

Lowest prices were made in the least hour, when heavy selling of the least-ers, undoubtedly accelerated by the shorts, more than wipedh out all the previous gains and sent some stocks under yesterday's low level. The movement was the more noteworthy from the fact that for the first time in some weeks activity increased as quotations yielded. Final prices were a triffe above the lowest, but the undertone was heavy.

Bonds here were strong at the outset, but fell back later in sympathy with stocks. Total sales, par value, were \$3,258,000.

United States governments were unchanged on call.

United States governments were un-changed on call. Total sales of stocks for the day were 951,800 shares.
